

Predictive Index Australia

Checklist: It all starts with a simple checklist

It appears to be a simple adjective checklist, however the Predictive Index (PI) is a sophisticated instrument that's been scientifically validated to be a reliable predictor of work-related behaviour. As anyone who has completed PI will tell you, the results are uncannily accurate.

The predictive Index checklist is available in sixty languages, plus Braille.

PI Checklists			
Afrikaans	Farsi	Khmer	Slovak
